Art Unit: 1615

The response file 20 September 2004 has been entered.

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-4 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-16 of prior U.S. Patent No. 6,406,715 B1 (Cefali). This is a double patenting rejection. The claims remain rejected for the reasons set forth in the prior office action mailed 19 March 2004. Applicant feels the application does not claim the identical subject matter as that claimed in the reference. Applicant claims a formulation considered to be a composition of matter. "A composition of matter is a composition of two or more substances or a composite article, whether it be the result of chemical union or of mechanical mixture or whether it be a gas, fluid, powder or solid." MPEP 2106, page 2100-14. Rev. 2 May 2004. In examining applicant's claims the claims are given the broadest reasonable interpretation. Applicant's claim 1 is a composition comprised of nicotinic acid in a formulation, meaning nicotinic acid and a carrier. The scope of applicant's composition claims clearly read on the reference cited. While applicant's arguments are directed to biopharmaceutical features, absorption, metabolism, plasma levels and excretion of niacin, there are no claimed distinguishing elements or limitations in the claims to enable the formulation to function in accordance

Art Unit: 1615

with applicant's assertions. Applicant's arguments appear more suitable for process or method claims however a composition is being claimed.

3. Claims 1-4 are rejected.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
